

UNIFIED ECOSYSTEM OVERVIEW

Intermaven Network • Master Platform Strategy & Business Architecture

1. High-Level Vision & Ecosystem Strategy

The **Intermaven Network Ecosystem** is a unified, next-generation music-business operational platform and direct-to-consumer marketplace. Rather than forcing creators, record labels, music supervisors, and fans to fragment their workflows across multiple disconnected third-party software tools, our ecosystem combines **AI business tools, direct catalog monetization, sync placement, and consumer streaming** into a single, self-reinforcing network powered by a unified Single Sign-On (SSO) and shared credit engine.

2. The 4 Interconnected Core Platforms

Intermaven intermaven.io Parent platform housing Mother-CMS grid, Mother-EPK Builder, and Social AI Studio for automated campaign asset generation.	TuneMavens tunemavens.com Music business community & marketplace hub. Handles catalog elections, label rosters, contracts, and split ledgers.
TuneStream tunestream.co Direct-to-consumer lossless audio streaming and discovery player. Direct artist tipping, offline cache, and fan analytics.	SyncMavens syncmavens.com Sync licensing marketplace connecting artists to supervisors via Option 1 (Agency) & Option 2 (15% Agency Fee).

3. Targeted User Personas & Customer Matrix

User Persona	Motivations & Core Needs	Primary Platform Ingress	Key Ecosystem Features
Creators (Artists, Songwriters)	Catalog distribution, contract safety, sync licensing, AI marketing	tunemavens.com / intermaven.io	Split Cascade Engine, AI Recommendation Agent, Mother-EPK
Record Labels & A&R	Roster ingestion, track management, catalog split tracking, payouts	tunemavens.com (Label Console)	Catalogue Roster CSV Ingestion, Advance Recoupment Ledger
Music Supervisors	Cleared audio stems, transparent licensing splits, zero-friction matching	syncmavens.com	AI Sync Match Simulator, Interactive Brief Index
DJs & Engineers	High-bitrate audio pools, studio mastering previews, track stems	djs.tunemavens.com	DJ Pool Engine, Mastering Preview Testbed
Media Houses	Programmatic content acquisition, bulk sync licensing, custom portals	media.tunemavens.com	Media House Routing, Bulk Contract Subsystem
Everyday Listeners / Fans	High-fidelity streaming, artist discovery, direct tipping, offline playback	tunestream.co	Lossless Stream Player, Direct Artist Tipping

4. Unique Market Positioning & Competitive Advantages

1. Closed-Loop Creator-to-Consumer Pipeline

Tracks ingested via **TuneMavens** flow instantly into **SyncMavens** for licensing pitches, **TuneStream** for consumer streaming, and **Intermaven** for AI social marketing.

2. Dual Licensing Frameworks & Exact Waterfall Breakdown (Option 1 & Option 2)

Unlike traditional sync publishers that lock up catalogs with advances, **SyncMavens** operates on two transparent frameworks:

- **Option 1 (Guaranteed Placements):** 30% Agency Fee (off top) • 25% SyncMavens Admin Fee of remainder (17.5% gross) • **52.5% Net Creator Royalty Pool** • **100% Writer & Composer Publishing Shares Retained.**
- **Option 2 (Sync Brief AI & 'Sync Ready' Gallery):** **15% Agency Fee paid to SyncMavens** • **85% Direct Net Creator Payout** • AI brief matching, 45s previews, stem vault.
- **\$0 Upfront Advances:** Zero predatory catalog buyouts. We only earn when creators get placed.

3. Mother-CMS & Shared Token Architecture

Intermaven acts as the mother platform driving shared design tokens, multi-tenant UI grids, and localized key overlays across all sub-applications.

4. Native AI Business & Social Studio

Built-in AI tools (Claude Sonnet 4.6 Recommendation Agent, Gemini/Sora Social AI Studio) generate channel-optimized creative assets (1:1 square, 9:16 vertical video).

5. Shared Single Sign-On (SSO) & Unified Credit Bank

Sign in once across all 4 platforms. Credits earned from TuneStream listener tips or marketplace sales are spent on AI runs or CRM marketing campaigns.
